Oughtibridge Primary School has had a successful partnership with St. Andrew's Lower Basic School in The Gambia for over five years. Through this partnership, the children at Oughtibridge are able to develop a better knowledge of the wider world and have a valuable friendship with children who live very different lives. The schools exchange work, letters, cards, photos, posters and Powerpoint presentations to help each other understand the different cultures. The children at Oughtibridge Primary School also enjoy raising money, through fund raising activities, to support our link school; the money we have raised has contributed towards the purchase of essential stationary items for school, basic kitchen equipment for the school, playground toys and, most recently, solar panels so the school has its own source of electricity. The children at Oughtibridge are able to see how they can directly improve the lives of others.
